

2027 Software Engineer I – Launch Program (FTE role JD)

About Mastercard

Mastercard powers economies and empowers people in more than 200 countries and territories worldwide. Together with our customers, we're building a sustainable economy where everyone can prosper. We support a wide range of digital payments choices, making transactions secure, simple, smart, and accessible.

Make an Impact as a Software Engineer

As a **Software Engineer I**, you will begin your career building real-world software solutions that support secure, scalable, and high-performing technology platforms. This role is designed for individuals who are excited to learn, grow, and apply software engineering skills in a collaborative environment.

You will work alongside experienced engineers, receive structured onboarding and mentorship, and contribute to projects that impact customers globally.

What You'll Do

- Write clean, maintainable code following established standards and best practices
- Contribute to design, development, testing, and deployment of software features
- Write basic automated tests to validate expected behavior and quality
- Apply secure coding practices and defensive programming techniques
- Participate in code reviews and incorporate feedback
- Use debugging tools, logs, and documentation to help identify and resolve issues
- Learn and work with existing systems, tools, and development workflows

Responsibilities, tools, and programming languages may vary by team.

Note:

- This is very broad overview of role description and exact profile of every other joiner might vary team to team.
- Specific responsibilities and development tools/languages used will vary based on team placement.

Launch Program Experience

The Launch Program provides structured development alongside your role, including:

- Company and technical orientation
 - Professional skills workshops
 - Innovation and social impact experiences
 - Global volunteer opportunities
 - A supportive early-career community and mentorship
-

Qualifications

- Currently pursuing a Bachelor's or accelerated Master's degree in Computer Science, Engineering, or a related field graduating by May/June 2027
- Project-based experience (academic, internship, or personal) using one or more programming languages such as Java, JavaScript, Python, or C#
- Advanced proficiency in data structures, algorithms, and core computer science concepts
- Familiarity with version control tools (e.g., Git)
- Experience or coursework involving automated testing
- Strong problem-solving skills and eagerness to learn

Eligibility Criteria

- Minimum 75.00% or above in 10th and 12th standard.
- CGPA 7.50 or above (no rounding off) from the first Semester till date [up to 6 semesters]
- No Standing Arrears
- Any break in education should not exceed 24 months.
- Age limitation: 18 (min)-28 (max)
- Completion of all courses with stipulated time as specified by your university. Like B. Tech should be completed in 4 years and in case you have backlog in the last semester; it will be considered as extended education and our offer will be revoked.
- **Interns who did not receive a preplacement offer in their internship tenure at Mastercard should not appear for the Full-time hiring process.**
