Education

Sardar Patel Institute of Technology **2023 – Present**
B.Tech in Computer Science and Engineering *CGPA: 8.03/10*

Pearl Academy **2024 – Present**
Minor in UI/UX *CGPA: 8.40/10*

Chate School & Junior College of Science **2021 – 2023**
Higher Secondary Education *81%*

Experience

Software Developer Intern **Aug 2026 – Present**
MSG Technologies

- Contributing to the development of FileFree QMS, a SaaS-based Quality Management System that digitizes inspections, registers, and audit workflows for manufacturing environments.
- Developing backend services using Java and Spring Boot, implementing RESTful APIs, business logic, and CRUD operations for application modules.
- Integrating frontend and backend components, testing REST API workflows, debugging application issues, and delivering end-to-end features based on project requirements.

Full-Stack Developer Intern **April 2026 – June 2026**
Skillbit Technologies

- Developed 3+ full-stack web applications using JavaScript, HTML5, CSS3, RESTful APIs, and MySQL, delivering responsive and user-friendly solutions for real-world requirements.
- Implemented 15+ CRUD-based features and RESTful APIs for seamless frontend-backend communication and efficient application data and workflow management.
- Managed MySQL database operations and resolved 20+ frontend, backend, and database issues, ensuring reliable end-to-end application functionality.

Projects

AI Inventory & Dynamic Pricing Engine | *Java, Spring Boot, React, PostgreSQL, Docker, LLMs*

- Built a full-stack commerce intelligence platform using Spring Boot and React that monitors inventory and demand signals to generate dynamic pricing and stock-replenishment recommendations.
- Implemented event-driven asynchronous processing using Spring Events and @Async, with AI-powered recommendations through Gemini, Groq, and Ollama plus an automatic rule-based fallback for reliability.
- Engineered RESTful APIs and real-time SSE streaming, with PostgreSQL persistence and Docker Compose containerization, including a human-in-the-loop approval workflow for pricing and reorder decisions.

Answer Sheet Evaluation System | *PaddleOCR, SBERT, Mistral AI, NLTK*

- Developed an end-to-end answer evaluation pipeline using PaddleOCR, SBERT, Mistral AI, and NLTK, reducing manual evaluation time by 80%.
- Designed a hybrid scoring engine combining SBERT semantic similarity and LLM-based reasoning, achieving 90% accuracy improvement.
- Processed and evaluated 500+ handwritten answer sheets using OCR and NLP techniques for automated assessment.

Technical Skills

Languages: Java, SQL, JavaScript **Frontend:** HTML5, CSS3 **Backend:** Spring Boot, RESTful APIs
Databases: MySQL, PostgreSQL, MongoDB **DevOps:** Docker **Tools:** Git, GitHub, VS Code, GitHub Copilot
Concepts: DSA, OOP, DBMS, Operating Systems
